

Team Contract

Group: Lauren Luo and Sarah Shader

Goals:

Is it acceptable for one or two team members to do more work than the others in order to get the team an A?

Yes it is, but the instructors should be informed about the imbalance of work. Otherwise it is unfair for all members of the group.

Meeting Norms:

How will you use the in-class time?

We will meet and discuss our progress during the in-class time and make plans for future work.

When will you meet before the Thanksgiving holiday?

We will meet Tuesday night. We will also meet before class on Monday.

Work Norms:

How will work be divided among team members?

Evenly dividing up the different classes and the corresponding tests. For any given class, one person will write the bulk of the implementation while the other person will write the bulk of the tests. However, it will ultimately be collaborative.

Where will you record who is responsible for which tasks?

We will keep track of this using comments in the Java documents and we will also keep a collaborative Google doc to keep track of our progress.

Decision Making:

Since there are only two people, we will consult each other before making major decisions, and we will be reasonable enough to come to a decision in a timely manner.
